The 12th International Workshop on Measurement , prevention, protection and management of CBRNE risks follows the successful 7th IARP-RISE'2015 held at the Portuguese Naval Base (BNL), the next ones combined with the TC17 ISMCR symposiums (USA 2019, Hungary 2020, Brazil 2021, the 10th and 11th RISE' 2022/2023 held at ICI, Belgium and it is aiming to gather high quality original contributions in the cross-border crisis management, the USAR topics, the CBRNE field and associated CBRNE measurements, prevention, protection and management with the final goal of assessing the most recent developments in this utmost domain of science and technology. The Workshop scope covers a broad spectrum ranging from advanced conceptual and virtual design and methodology, sensors, actuators, instrumentation, and real-time control algorithms to innovative crisis management software, mobile (ground/aerial/undersea) robotics, personal and collective protection, multilevel rescue operations and management applications. It will contribute to provide a full picture of the state of the art in the area of increasing environmental risks. The key words you will use are essential to organize the different sessions for this conference..

Scope and Topics

Measurement of CBRNE –related environmental risks
 Environmental CBRNE surveillance
 Search and Rescue in cross-border incidents/accidents)
 Medical management of CBRNE agents in indoor targets (teaching facilities, entertainment facilities, hospitality facilities, etc.)
 USAR ground/aerial/maritime robotic systems
 CBRNE detection sensing systems

General Chairmen
 Prof Em Yvan Baudoin (ICI/IMEKO TC17)
 Med Dr I. Galatas (CBRN KC)
 Med Dr VAN TRIMPONT (MED KC)

Program Co-chairs

Dr Ir Zafar TAQVI Chairman IMEKO TC17
 M.Y.DUBUCQ (Dir ICI)
 M. C.I.LEFEBVRE (CF-NRBC)
