

CSE 2026

8th

Conference for
Sustainable Energy

October 29-31, 2026

Transilvania University of Brasov, Romania

Renewable Energy Systems and Recycling Research Centre, Transilvania University of Brasov under the aegis of:

- *Romanian Academy of Technical Sciences,*
- *Renewable Energy Commission of the Romanian Academy,*
- *Green Energy Hub of Universitas Montium Alliance,*
- *European Sustainable Energy Innovation Alliance,*
- *Technical Committee for Sustainable Energy Systems al International Federation for the Promotion of Mechanism and Machine Science*

invites you to the **8th edition of the international Conference for Sustainable Energy - CSE 2026** which aims to bring together professors, researchers, scientists, experts and doctoral students who work in the comprehensive field of renewable energy systems implemented in the energy-efficient built environment, to disseminate the latest research results, to facilitate the exchange of experience, as well as to establish future research directions in this field.

Main theme of the conference: Energy communities

Accepted presentations will focus on, but are not limited to, the following topics:

- *energy efficient built environment,*
- *solar thermal, geothermal and biomass systems,*
- *photovoltaic, wind and micro hydro systems,*
- *hydrogen, hybrid and cogeneration systems,*
- *mechanisms for renewable energy systems,*
- *sustainable mobility,*
- *water and wastewater treatment systems,*
- *artificial intelligence, education and policies*

for energy communities.

Full papers submitted and presented at CSE 2026 will be internationally peer-reviewed and published in a volume in the Springer Proceedings in Energy series or may be selected for publication in prestigious Clarivate-indexed journals, such as Renewable Energy or Environmental Engineering and Management Journal.

[Final paper deadline July 31, 2026!](#)

Further information on CSE 2026 is available at: <https://cse.unitbv.ro>
